LIFE SCIENCES IN TRENTINO

Trentino is a small Italian province in the heart of the Dolomites, known worldwide for the scientific excellence of its **internationally renowned research centres** and **innovative startups** and **enterprises**.

In this context, **Life Sciences** undoubtedly represent a strategic sector for the competitive growth of the region, which is an **international landmark in the areas of medtech, biotech, special service providers** and **enabling technologies**.

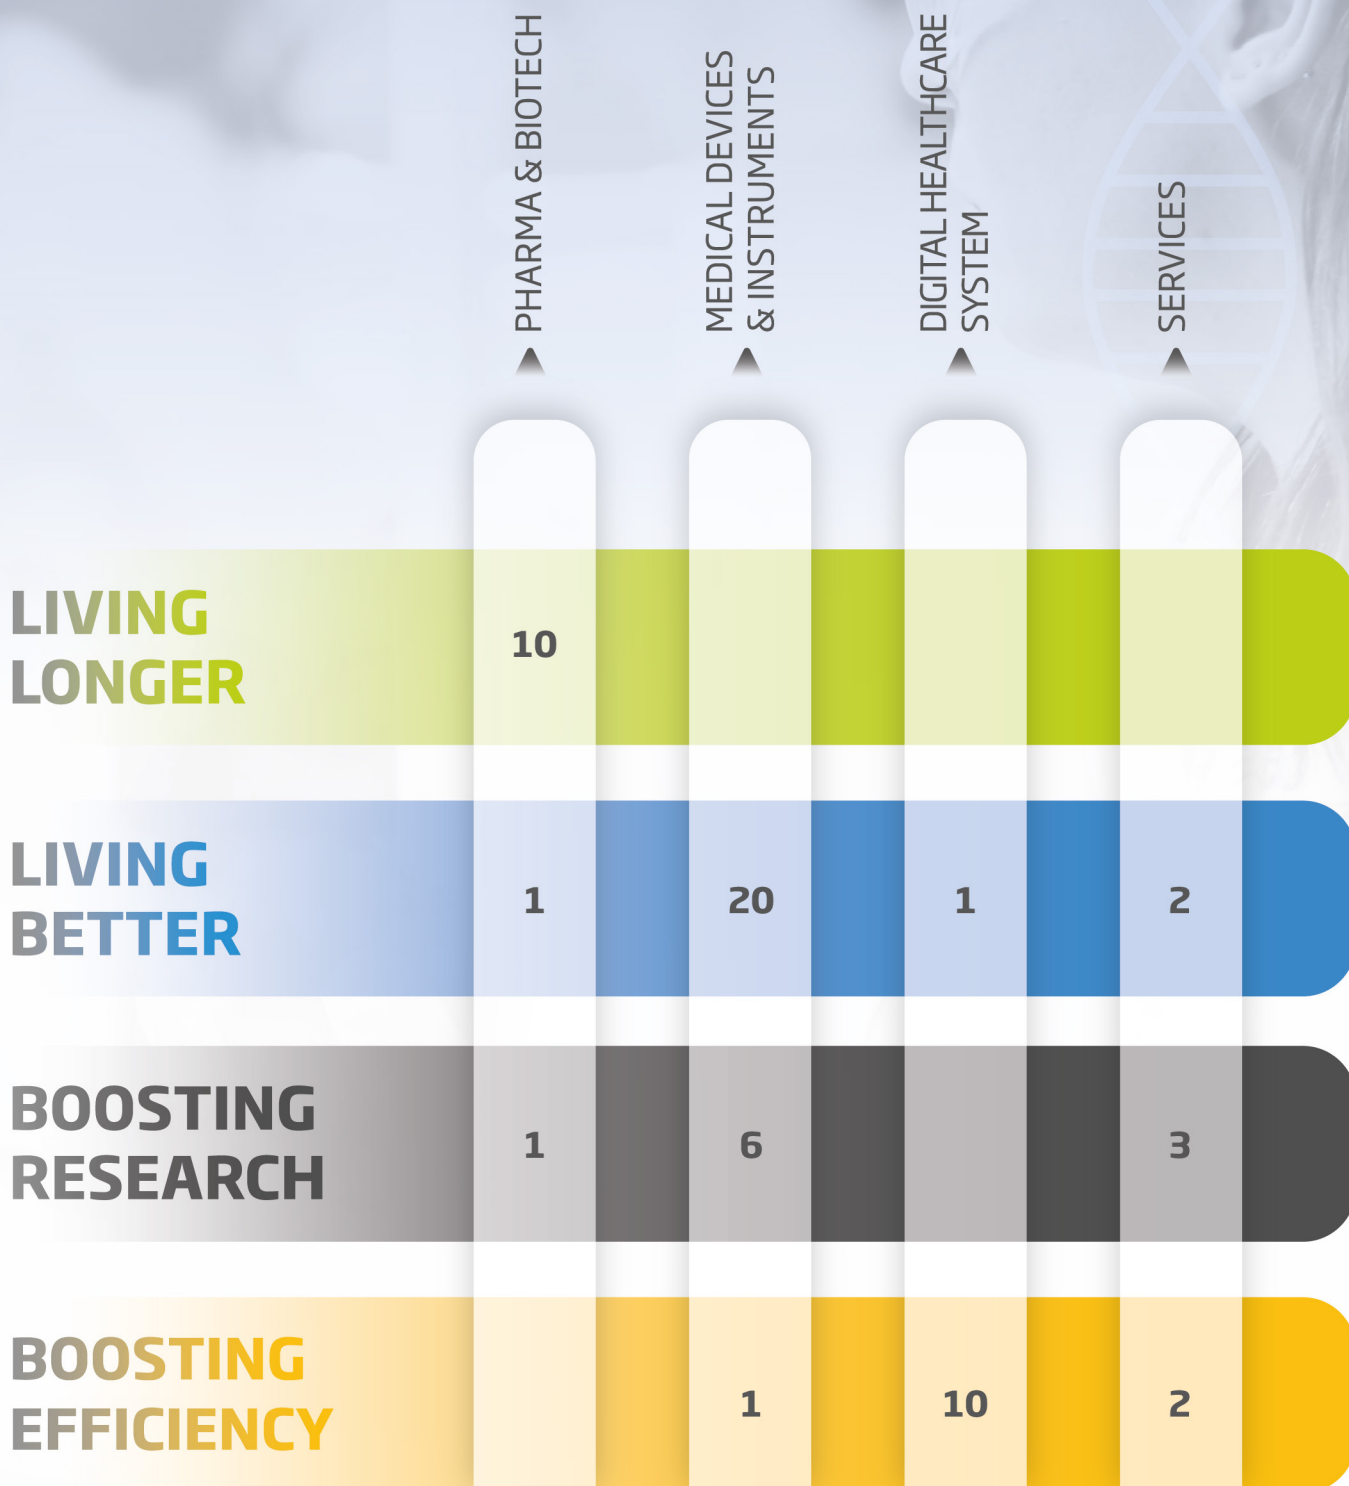

TRENTINO AT ARAB HEALTH 2025

Trentino is taking part in ARAB HEALTH 2025 with **16 companies** representing the excellence of the territory.

Trentino Sviluppo, the development agency of the Autonomous Province of Trento, has selected these companies within the **project SCIENCE4LIFE**, whose purpose is to build a network among local Life Sciences companies and to further develop the entire cluster.

CHINO.IO

CHINO.IO

Data protection, compliance and security are make-or-break issues for digital health and med tech companies. At Chino.io we advise you on these complex topics and help implement everything that you need on GDPR, HIPAA, ISO27K, and other data protection laws, as well as all the technical aspects of data security and application development (interoperability standards, integration protocols, API, middleware). We also cover specific regulations for reimbursement processes, such as Germany (DVG/ DiGa), France (PECAN, HDS), or the UK (NHS, App library, DTAC, Cyber Essentials).

NTP

NANOTECH PROJECTS

DIGITAL IMAGING

NTP NANO TECH PROJECTS

NTP operates in the field of nanotechnologies applied to the medical sector. The company develops innovative diagnostic equipment for Digital Pathology and Hematology, with two registered patents. NTP responds to problems such as the annual increase in cancer and other diseases, an aging population, a decrease in the number of pathologists, and hematologists, with systems for remote collaborative diagnosis and urgency cases.

AERSAFE

AERSAFE

Aersafe is a start-up company that develops devices for the treatment of indoor air quality. The machines not only guarantee air sanitized from pathogens but also reduce maintenance costs: thanks to an innovative system of filtration and self-sanitization, combined with 4.0 sensors, our machines can solve the trade-off between the quality of air filtration and operating costs, increasing the level of sanitization and eliminating the costs of routine maintenance.

COSBI

COSBI

Research center for Systems Biology that develops computational platforms for personalized medicine and nutrition. Founded in 2005 by Microsoft Research Cambridge and University of Trento, COSBI combines molecular, cellular, preclinical and clinical data from different sources to build a systemic view of biological processes in healthy and disease conditions, laying the foundations for mechanistic models and mathematical descriptions of complex and rare disorders.

- ▶ Export and internalization

THE LIFE SCIENCES HUB

The Pergine Valsugana Technology Centre, the **first biotech incubator in Trentino**, was designed to be a **scientific research infrastructure** suitable for **startups and medium size companies**, making available a varied set of tools and equipment.

The structure consists of a ground floor with a **large open space** ideal as a storage and warehouse space and a newly renovated first floor consisting of **offices, meeting room, private laboratories** and 2 laboratories containing equipment whose use and access it is allowed to all tenants.

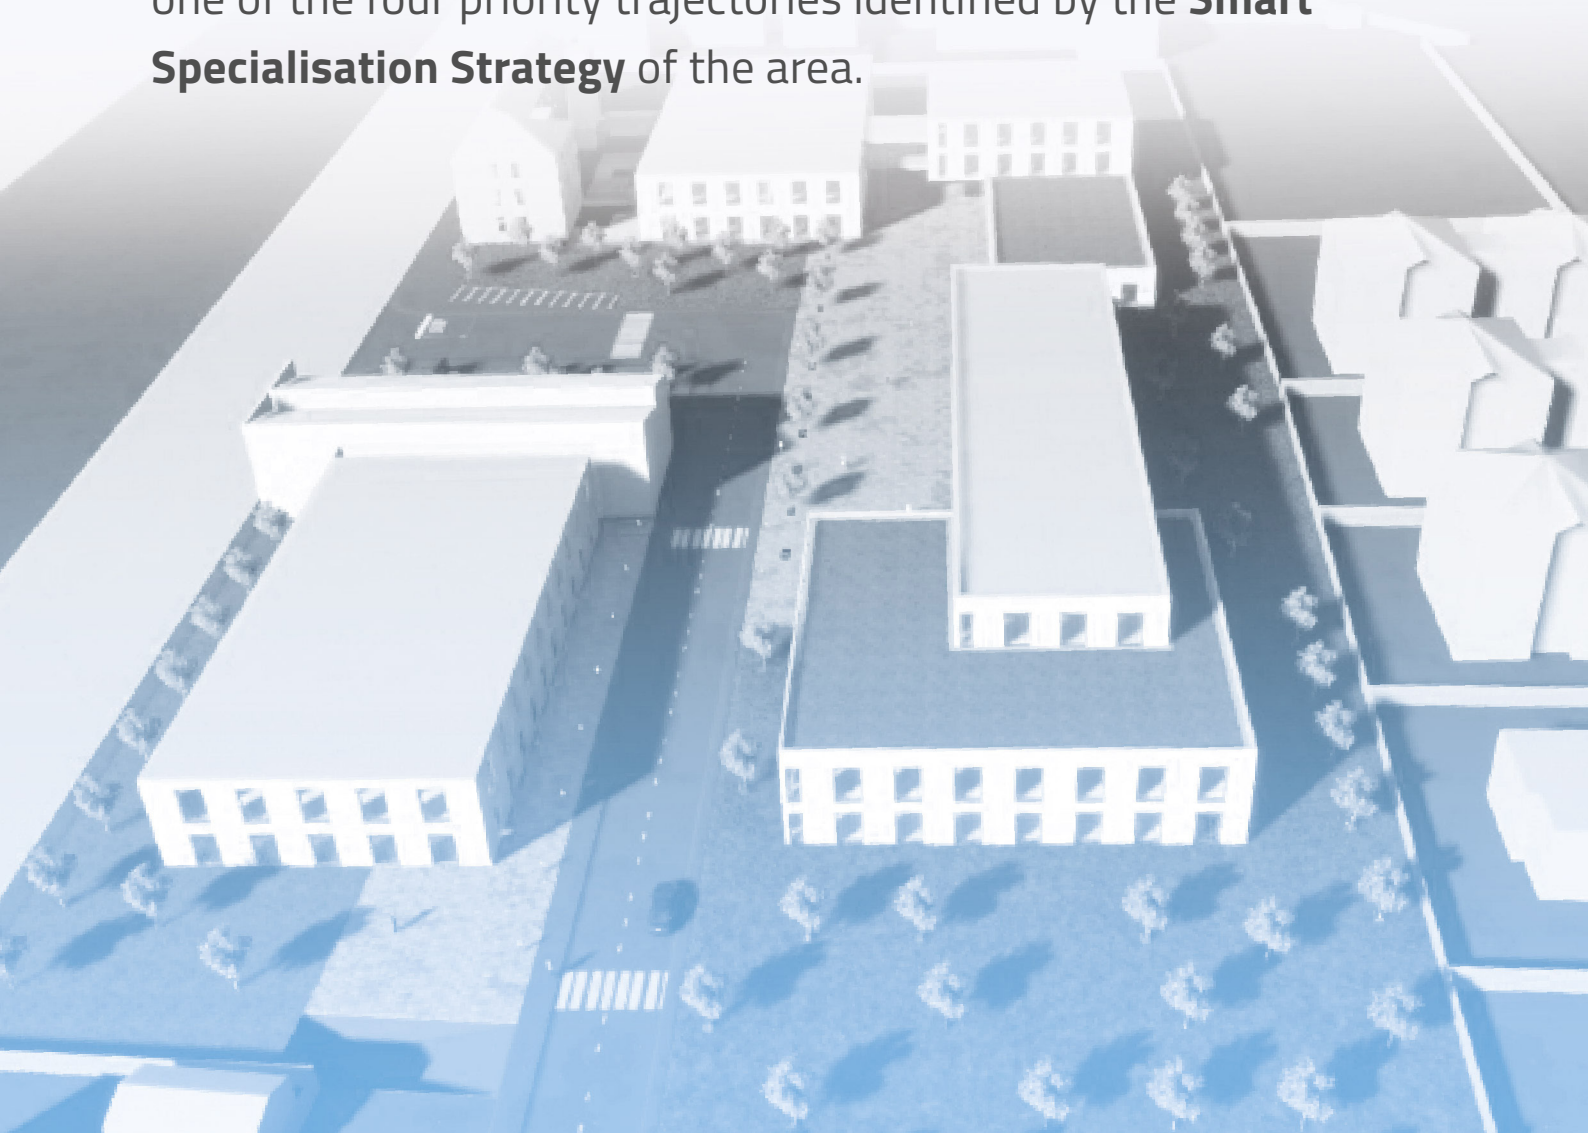

- **Laboratory 1** is equipped with chemical hood and vacuum cabinets for the storage of reagents, service station with sink, distilled water producer, industrial glassware washer and large counters.
- **Laboratory 2** is equipped with 3 biological hoods and CO2 incubators, furnished with a row of counters equipped with sinks, and is designed for sterile activities.

THE FUTURE LIFE SCIENCES HUB

In the coming years, a **new Life Science Hub will be built in Trentino** on an **area of 27.000 sqm.**, with the aim of **attracting R&D centres, startups, and mature companies** operating in the field of **red biotech**.

Life Sciences represent a **key sector** for Trentino's development, one of the four priority trajectories identified by the **Smart Specialisation Strategy** of the area.
